

ANALYSIS INTERPRETATION , MODELING

Date	12 November 2022
Team ID	PNT2022TMID39755
Project Name	Smart Waste Management System For MetropolitanCities
Maximum Marks	8 Marks

Node-RED is a [flow-based](#) development tool for [visual programming](#) developed originally by [IBM](#) for wiring together hardware devices, [APIs](#) and [online services](#) as part of the [Internet of Things](#).

Node-RED provides a [web browser](#)-based flow editor, which can be used to create [JavaScript](#) functions. Elements of applications can be saved or shared for re-use. The runtime is built on [Node.js](#). The flows created in Node-RED are stored using [JSON](#). Since version 0.14, [MQTT](#) nodes can make properly configured [TLS](#) connections.
